Welcome & Overview

Chief Executive and Chair Welcome

Fionnuala O'Leary
Chief Executive Officer

Mark Moran
Chair

Firstly, we would like to thank all our dedicated staff, volunteers and supporters for their dedication and focus in supporting seriously ill children and their families. Children's Health Foundation simply would not be able to exist without such an incredible and generous network of individuals who give up their time, expertise and resources to support this cause. We would particularly like to thank our Board of Directors who volunteer to provide support and governance towards ensuring that the Foundation remains robust, well governed and focused on the children and families we serve.

2024 was another year of emerging needs and new priorities for sick children and their families in hospital. Over the past year, the executive and board of Children's Health Foundation have maintained a strong focus on impact, resilience, and long-term transformation in children's healthcare. The Foundation remains committed to providing sick children and young people with the very best chance. Our role is not to simply address shortfalls in the health service, but to drive innovation and progress in paediatric healthcare.

By inspiring and engaging a community of fundraisers, volunteers, employees, and directors, Children's Health Foundation continues to be a catalyst for meaningful change. Through the power of fundraising and philanthropy, the Foundation supports families, healthcare workers, and researchers,

ensuring that children attending Children's Health Ireland hospitals and urgent care centres receive the highest standard of care.

In 2024, Children's Health Foundation continued to evolve as the principal fundraising organisation supporting Children's Health Ireland, both now and into the future. As preparations advance toward the opening of the new National Children's Hospital, the Foundation's focus has been twofold: continuing to support children, families, and healthcare professionals across existing CHI locations, while also strategically planning for its central role within the new hospital. This dual focus ensures that the Foundation is positioned to maximise its impact today and, in the years, to come, within a world-class paediatric healthcare environment.

2024 saw Children's Health Foundation respond to the challenges of the year and disbursed €5.3 million in financial support directly to both Children's Health Ireland (CHI) hospitals and urgent care centres, and to its research partners – Research Ireland and the National Children's Research Centre (NCRC), now merged with CHI through its Research and Innovation Office (RIO).

Research remained a key pillar of funding for Children's Health Foundation, paving the way for cures, prevention and gentler treatments. Through our partnership with Research Ireland, we had the third joint call for innovative paediatric focused research

projects in 2024, committing €2 million to this partnership, and a further €939k committed to Seed Funding for Research and Innovation projects directly in Children’s Health Ireland.

Governance and transparency are fundamental to all activities at Children’s Health Foundation. Our financial statements are prepared in accordance with the Statement of Recommended Practice (SORP) for Charities, following Financial Reporting Standard 102 (FRS 102), applicable in both the Republic of Ireland and the UK. We are fully committed to the highest standards of accountability, and proud to maintain compliance with the Charities Institute Ireland Triple Lock Standard—demonstrating our adherence to best practice in governance, ethical fundraising, and transparent financial reporting.

Our interim 2024 strategy focused on delivering an organisation fit for the future, which can deliver growth and support unmet needs in tandem with changes in Children’s Health Ireland. Through our generous partners and supporters, we delivered an income of €17.2m and saw a decrease in overall fundraising costs while focusing on a structure for the future of the Foundation. We strengthened our financial sustainability by carefully managing costs, diversifying our income streams, and successfully reaching new supporters.

We also continued to engage collaboratively with our CHI colleagues, developing and maintaining relationships with key personnel to ensure we are aware of the needs of patients and their families and healthcare professionals within the current hospital sites. Relationships and partnership are key to the Foundation being able to deliver on its mission and will continue to be a firm priority for our strategy going forward. These efforts are helping to ensure the long-term resilience of Children’s Health Foundation and our ability to support innovation, care, and research well into the future.

A major focus this year has been the development of our new organisational strategy 2025-2027 which will guide our work for three years. This strategy is being built to ensure that we are fully robust to deliver meaningful impact and capable for the transition to the new hospital. We are actively defining how our brand will align with this new national hospital, how donor-led funding can be channelled most effectively, and how we can drive long-term, multi-generational benefits through expanded investment in research and development.

The new strategy is built around five key priorities—delivering greater impact for sick children, strengthening partnerships, embedding operational excellence, laying the groundwork for ambitious growth, and evolving the Foundation’s brand to reflect its future role in paediatric healthcare.

We would like to thank the dedicated teams across the four different sites at Children’s Health Ireland in Crumlin and Temple Street Hospitals and urgent care centres at Tallaght and Connolly. Each day they care for sick and injured young people, giving them every chance to get well and ensuring their hospital experience is as comfortable as it can be. We constantly hear from families who are overwhelmed with gratitude for the incredible care their children have received during some of the most difficult times in their lives. We feel privileged to be able to support our colleagues who treat and care for these children. We also feel a great responsibility to ensure that there is a sustainable income for years to come so that we can invest in research and innovation which will help transform paediatric healthcare into the future. Through increasing funding to pioneering and personalised research, less children will get sick, and more children will get better.

About Us

Children’s Health Foundation continues to raise vital funds to support sick children and their families across the Children’s Health Ireland (CHI) hospitals and urgent care centres at Crumlin, Temple Street, Tallaght, and Connolly. With the generosity of our supporters, we funded life-saving equipment, essential patient and parental supports, and pioneering paediatric research—helping to drive real and lasting improvements in children’s health outcomes.

Every day, young patients rely on the expertise and dedication of the world-class medical teams within CHI. We are proud to stand alongside them, ensuring they have the resources they need to deliver the highest standard of care. As we look ahead to the opening of the new National Children’s Hospital in 2026, our work is focused not only on addressing current needs but also on building the future of paediatric healthcare in Ireland.

Our Values

Child-centred

The child is at the heart of everything we do. We are here to ensure every sick child has the very best chance and everything we do is to improve outcomes for sick children.

Compassion

We care for those we work with, and all our interactions are characterised by respect, courtesy, warmth, and professional dignity.

Integrity

We are true to our mission – always striving to do the right thing, by being open, honest, and transparent.

Respect

We value ourselves, each other and all members of our community showing understanding and appreciation for all our similarities and differences.

Ambitious

We are ambitious for the health and well-being of the children we serve, and we will do everything we can to ensure that each and every child has the very best chance of a full, healthy, and happy life.

Collaborative

We believe in the power of working together to improve outcomes for sick children.

Innovative

We constantly strive to redefine the standard of excellence in everything we do. We are open to ideas that challenge the conventional views and drive innovation and support better outcomes for children.

Funding Impact

In 2024, Children’s Health Foundation disbursed €5.3 million in financial support to Children’s Health Ireland hospitals and urgent care centres, and to Research Ireland and the National Children’s Research Centre (NCRC).

Impact Report

Our Impact at a Glance

Over the years, Children's Health Foundation has remained steadfast in its commitment to transform care for sick children across Ireland. Thanks to the generous support of our donors, we have been able to deliver significant services and meaningful support to patients, families, and staff at Children's Health Ireland hospitals and urgent care centres.

From funding life-saving equipment to ward and service development, and from patient, parent, and staff initiatives to life-changing research, we have continued to honour our

commitment to providing world-class facilities, research and compassionate and loving care for every sick child in Children's Health Ireland hospitals and urgent care centres.

Each year, Children's Health Ireland provides care to thousands of sick children and their families across its hospitals and urgent care centres. Behind every number is a child, a parent, a care team and a story of hope, healing, and resilience. We are honoured to be part of this journey and remain dedicated to making a positive difference in their lives.

Our Approach

To decide where to invest across research, equipment, new services, and patient initiatives, we employ a structured and impact-driven approach that ensures every donation makes a meaningful difference.

This approach includes:

Alignment with Mission and Priorities

Grants are aligned with the Foundation’s mission to enhance the care, treatment, and outcomes for sick children and their families.

Impact Monitoring

Ongoing impact assessments of funded projects are conducted. Insights inform future investments and continuous improvement.

Evaluation and Feasibility

Applications are rigorously assessed against key criteria to ensure investments deliver meaningful outcomes. Positive impact on sick children in Children’s Health Ireland and long term sustainability is prioritised.

2024 Facts and Figures at a Glance

“We will invest further in pioneering paediatric research, with a clear focus on improving health outcomes for this generation and the next.”

Our Plans for the Future

At Children’s Health Foundation, our commitment remains focused on ensuring that sick children and their families have access to the best possible care, comfort and hope. This is only possible through strong partnerships with our healthcare and research colleagues, whose support helps us expand our impact in meaningful and measurable ways.

We will continue to grow our grant making efforts, reaching more children and families through targeted funding calls across Children’s Health Ireland hospitals and urgent care centres. We will invest further in pioneering paediatric research, with a clear focus on improving health outcomes for this generation and the next. To ensure the greatest possible impact, we will maintain strict financial efficiency, directing the maximum amount of funds raised towards frontline care, services, and innovation. We also recognise the importance of demonstrating the difference we make, and will continue to enhance how we measure, evaluate, and communicate our impact.

Partnerships will play a central role in our future. We will continue to work closely with Children’s Health Ireland to align our efforts and accelerate progress. Through collaborations with research institutions such as Research Ireland, universities, and other children’s charities, we will strengthen our ability to respond to complex needs and deliver even more for sick children and their families.

Operational excellence underpins everything we do. We are committed to maintaining the highest standards of governance, while also investing in our systems and skillsets to unlock our full potential. Our team is at the heart of our success, and we will continue to foster a workplace culture that is inclusive, purpose-driven and people-centred. In everything we do, we aim to provide exceptional service to our supporters and stakeholders, building lasting trust and connection.

We are also laying the foundations for ambitious growth. This means developing a more varied and sustainable income portfolio that can withstand economic shifts and funding challenges. We will focus on growing our base of direct supporters and ensuring that every fundraising activity is cost-effective, strategic, and impactful. At the same time, we are committed to cultivating an agile, innovative culture where ideas can be tested, refined, and scaled.

Finally, we are evolving the personality and identity of Children’s Health Foundation to meet the needs of the future. We aspire to be Ireland’s most recognised and trusted children’s charity, with a brand that truly reflects our values and the people we serve. By delivering exceptional supporter experiences and empowering our employees, volunteers, and beneficiaries to become champions of our mission, we will strengthen the connection to our cause.

Together with our community of supporters, patients and their families and healthcare partners, we will continue to drive change, deliver hope, and improve lives, one child, one family, one breakthrough at a time.

Patient, Staff and Family Services

Thanks to the generosity of our supporters, we funded a total of 164 initiatives to the value of €1.4 million across Children's Health Ireland hospitals and urgent care centres in 2024. These initiatives have provided essential services that provide comfort and compassion during the most challenging times for patients, parents and families.

From creating moments of joy and laughter on the wards to reducing stress for parents, and fostering staff engagement, these services have significantly strengthened connections and encouraged collaboration among patients, families, and staff across Children's Health Ireland hospitals and urgent care centres.

VIP Days on Surgical Flat Ward

Children's Health Foundation funded the VIP (Very Important Patient) Days on the Surgical Flat in Children's Health Ireland at Temple Street in 2024.

The initiative was developed by the Play Specialist and Clinical Nurse Manager to support long-term patients facing extended hospital stays. It began with one young girl from Donegal who was feeling particularly low during her time in hospital, far from her home, family, and friends.

Her mother had said that she was worried about her daughter's mood, and it was clear that a regular party was out of the question. Thinking outside the box, the team organised a personalised celebration "Donegal Day" with games, laughter, prizes, and treats. It was a massive success, that helped hugely to brighten a difficult time.

The success of the day was evident, when the patient called it the "Best Day Ever," and the value was not only clearly seen by her but also by her mother and the rest of the care team. Emboldened by this experience, the team created "VIP Days" to offer other children who may need a morale boost along their hospital journey celebrations likewise tailored to their interests.

Since then, the Surgical Flat has hosted 11 VIP Days, each designed to bring joy, comfort, and a sense of normalcy to children spending long periods in hospital. The VIP Day themes are centred around things that are important to the patient, e.g., hobbies and interests, county GAA, home, or a wish to be the boss for the day. As one young patient put it:

"Everyone wants to be part of a VIP Day because they are so much fun!"

"Thanks to the generosity of Children's Health Foundation and the supporters, these days have become even more special. Funding has allowed the team to provide themed sustainable decorations, delicious food, sweet treats, and even tickets to events. From Princess Day to superhero parties, each VIP Day offers a chance for young patients to simply be children again if only for a little while."

VIP Days are a powerful reminder that even in difficult times, small moments of joy can make a big difference.

Sparkle Staff and Patients events Committee

In 2024, the team at Children's Health Ireland at Crumlin identified a clear need for meaningful celebrations for both families and staff, prompting the formation of the Sparkle Committee. This multidisciplinary team comprised of hospital staff from various departments who plan and deliver uplifting events throughout the year to foster joy, connection, and well-being among patients and staff. Feedback has been overwhelmingly positive as the funds enabled vibrant decorations and events that make hospital days more memorable and comforting.

The Sparkle Committee met monthly and with their boundless enthusiasm and crucial funding from our supporters, they transformed ideas into realities. Parents appreciated the cheerful atmosphere. Patients enjoyed the festivities and chance to be a child again, and staff felt valued and motivated. Strengthening team spirit and community as well as boosting morale.

Through the funding given in 2024, the Sparkle Committee transformed hospital life at Crumlin and later across Children's Health Ireland sites with a year-round calendar of engaging and heartwarming events. From Halloween ward-decorating contests and Easter bonnet competitions with Bunny visits, to a full Christmas spectacle featuring an Elf Town toy shop, superhero ward visits, pyjama giveaways, Santa's disco "flight," and festive selfies, the impact was immense.

They also celebrated Valentine's Day with chocolates, St Patrick's Day with treasure and pot-of-gold hunts, and International Nurse's Day with cross-site award ceremonies and treats for staff. Enthusiastic volunteer-led decor, themed activities, and widespread participation from families and staff brought joy and unity throughout the year.

“Staff in hospital work extremely hard all year around and they also have quite diverse backgrounds and nationalities to cater for. The funding provided by Children's Health Foundation and their supporters was instrumental in helping us to carry out all the activities and ensure staff and patients' wellbeing was catered for.”

Trisha Hynds
Sparkle Department, Crumlin

Healthy Living with CHI, Connecting with Families Event

Children and young people attending the Healthy Living with Children's Health Ireland Service / Child & Adolescent Complex Obesity Service face many barriers to engaging with healthcare and active play. These include stigma, developmental needs, long waiting lists, multiple appointments, and geographical challenges. Stigma in particular can leave families feeling judged or isolated, making them hesitant to engage with services.

To address these challenges, the service hosted a connection day, creating an inclusive and supportive space for families to connect, learn, and have fun together. A total of 64 people attended, with activities designed to build confidence, reduce isolation, and strengthen family bonds. Children took part

in indoor and outdoor activities, supported by staff and volunteers using a "challenge by choice" approach that encouraged participation at each child's comfort level. Families shared meals, music, and dancing, helping to foster a relaxed atmosphere.

Alongside the activities, eight staff delivered interactive workshops for parents on nutrition, physical activity, sleep, screen time, and emotional health. The event strengthened relationships between families and professionals, led to improved service engagement, and gave children valuable opportunities for peer connection. Parents reported gaining practical knowledge, while families left feeling cared for, supported, and more confident in managing their child's health.

Enhancing Infant and Parental Mental Health Through Infant Massage

For many infants in the care of Children's Health Ireland's neonatology services, the first weeks of life are spent in hospital undergoing complex procedures such as abdominal surgery and the frequent insertion of intravenous or nasogastric lines. Many are entirely dependent on intravenous or tube feeding. Parents must manage both the emotional strain of their child's condition and the physical separation, which can delay bonding and impact later development.

With support from donors, infant massage has been introduced to help families during this time. In 2024, 13 staff including occupational therapists, physiotherapists,

speech and language therapists, and a play assistant completed accredited training. Each received a demonstration doll, with additional premature-sized dolls and parent handouts provided to support neonatal families.

Research shows infant massage strengthens bonding, supports parental confidence, and improves infant and parent mental health. Staff also report that the programme is rewarding and beneficial, particularly for families receiving palliative care.

Stephanie Fleming
Physiotherapy, Crumlin

Ward and Service Development

Thanks to the generosity of our supporters, we awarded grants to 12 new and emerging services worth €0.2 million in 2024 to enhance access to, and the delivery of, care across all Children's Health Ireland hospitals and urgent care centres.

These initiatives have fostered inclusivity, innovation, and ongoing learning, further reinforcing our commitment to give every sick child the very best chance.

**“You’ve changed my life.
Now I know the whole
team is looking out for
my baby’s mental health.
That means everything
to me as a parent.”**

Tiny Minds

Tiny Minds is Ireland’s first dedicated neonatal psychology service, established within a paediatric setting at Children’s Health Ireland. It represents a major step in integrating psychology and neonatology.

With donor support, we developed the infrastructure needed to research, develop, and deliver psychosocial interventions for families and staff in the neonatal intensive care unit (NICU).

The importance of this service is reflected in the story of Sarah, a mother of twins born at 26 weeks. Tragically, one of her sons, Joe, died at six weeks, while her other son, Jack, who has chronic lung disease, is expected to remain in hospital for several more months. Sarah is deeply traumatised, and although her presence is vital for Jack’s recovery and bonding, she struggles even with brief visits. While psychological therapy for trauma usually takes time, Jack cannot wait. Infant outcomes in neonatal care are strongly influenced by the quality of early caregiving relationships. The first few days and weeks of life lay the social and emotional foundations for lifelong wellbeing and mental health, making this a critical psychological juncture.

Even when loss is not involved, having a baby in ICU represents a profound emotional upheaval, the loss of a normal pregnancy or birth, the immediate bonding that comes with taking a healthy baby home, and the expectations of a healthy start. Premature births are unplanned and can be deeply traumatic for families.

Specialised psychological care within NICU settings is therefore essential to improve outcomes, prevent long-term health issues, and support family-centred care. Research shows that up to 30% of NICU parents experience a diagnosable mental

health disorder, while staff are at risk of burnout, compassion fatigue, and secondary traumatic stress.

Thanks to the generosity of our supporters, Tiny Minds has already delivered measurable impact. An initial psychosocial audit of 34 NICU families led to streamlined, targeted psychological interventions, reducing therapy sessions from 26 to a maximum of 12. An induction book for Neonatology at Children’s Health Ireland, Crumlin, has been developed and is now being adapted for the new National Children’s Hospital. Staff psychological support for trauma has been introduced, alongside 12 sessions of weekly Family Integrated Care (FiCare) training.

Overall, the Tiny Minds Project is contributing to a cultural shift within the NICU, placing psychological wellbeing and family-centred care at the heart of practice.

Claire Crowe, a staff member, commented:

“We’re making real progress as a neonatal team by placing psychological wellbeing and family-centred care at the heart of what we do. The grant from Children’s Health Foundation has allowed for shorter, more focused interventions with better outcomes. Weekly FiCare and Infant Mental Health training is shifting our culture, and staff trauma support has made a real difference.”

“It has laid the foundation for lasting, systemic change in how neurodivergent children are cared for.”

Adapting the Neurodiversity Affirmative Paradigm in Paediatric Care

Funding from Children’s Health Foundation enabled the successful implementation of a full-day, cross-site neurodiversity-affirmative training programme for staff across Children’s Health Ireland.

The project aimed to equip staff with the knowledge and tools to provide inclusive, strengths-based care to neurodivergent children and young people including those who are autistic, have ADHD, dyslexia, or other neurodevelopmental differences. Training introduced a neurodiversity-affirmative framework, with a strong focus on understanding sensory and environmental needs, with the goal of improving care and outcomes for neurodivergent families across the Children’s Health Ireland network.

Before this initiative, there was no coordinated training or standardised best-practice guidance for neurodivergent care. Staff identified significant knowledge gaps, and the absence of a consistent, up-to-date framework led to variability in care, increased patient anxiety, and potential negative impacts on outcomes. A total of 35 clinicians from psychology, nursing, occupational therapy, physiotherapy, and medicine completed the full-day interdisciplinary neurodiversity-affirmative training, each influencing hundreds of patient interactions annually and extending the programme’s long-term impact across the CHI network.

Participants received a toolkit and sensory-friendly clinical guide to support practical application. Staff reported increased confidence in adapting communication and clinical approaches to the neurodiversity-affirmative framework. Many have initiated departmental changes, including sensory adaptations in waiting areas and adding patient-specific care cues into records. Others

are sharing their learning with colleagues, promoting inclusive language use and team-based practice improvements.

Some Clinicians also had this to say after the training:

“The training was extremely well-received. The project successfully met its objectives, laying the groundwork for systemic, sustainable change. Children’s Health Ireland is now better prepared to embed neurodiversity-affirmative care into daily practice an essential step.”

“We would like to thank Children’s Health Foundation for the funding to run this training. It enabled vital training that has laid the foundation for lasting, systemic change in how neurodivergent children are cared for at Children’s Health Ireland.”

Sinéad D’Arcy-Bewick,
Psychology Department, Crumlin

LED “sky ceilings” at the Laurels Clinic:

Creating a child friendly environment within a Forensic Medical Unit

The Laurels Clinic provides forensic medical and child protection assessments for children and young people who have experienced rape, sexual abuse, or sexual assault. As the only clinic of its kind in Dublin and much of Leinster, it manages around 170 appointments each year, supporting approximately 120 families in a safe and supportive setting.

Until recently, however, the clinical rooms felt stark and sterile. While these spaces must remain clear to facilitate forensic examinations often carried out with An Garda Síochána the atmosphere could feel cold and intimidating, particularly for children and adolescents already experiencing acute distress.

To address this, LED “sky ceiling” panels were installed across the clinic. In just two months, the transformation has been remarkable. One room in particular an internal space with no windows has been completely revitalised by the natural light effect of the panels. The design draws on therapeutic principles, echoing international research

highlighting the positive impact of natural imagery on adolescent service users. For young people coping with trauma, such visuals provide comfort, distraction, and a gentle sense of escape.

Feedback from staff reinforces this impact:

“The first thing I think of is calming and distracting. I’d be making shapes out of the clouds. It’s bright and beautiful, a safe feeling, almost like being protected by nature. Everyone at the Laurels Clinic is deeply grateful for the funding that made this project possible. The panels have created focal points of interest in each room, softening the necessary clinical environment and making the spaces more welcoming for children and families.”

Jacqui Crowley, Laurels Clinic, Children’s Health Ireland, Tallaght

Vital Life-Saving Equipment

Thanks to the generous support of our donors, we funded the delivery of 64 vital, lifesaving equipment worth €2.1 million, across various clinical and surgical wards within Children’s Health Ireland hospitals and urgent care centres.

This investment has significantly improved patient care, enhanced the delivery of medical services and reaffirmed our commitment to provide world class health care facilities for every sick child in Ireland.

Advanced Simulation Equipment to run weekly simulations in Paediatric Intensive Care Unit PICU

Before receiving funding from Children's Health Foundation, the PICU team faced significant challenges in delivering consistent and timely paediatric simulation training. Equipment had to be borrowed from the Resuscitation Team, leading to scheduling conflicts, delays, and restricted access. With support from the Foundation, funding was secured for a SimCube and advanced baby and child manikin. This investment strengthens Children's Health Ireland's commitment to clinical education and patient safety and plays a vital role in neonatal and paediatric emergency training.

A major interdisciplinary simulation brought together more than 20 specialists from Theatre, Cardiac Surgery, Cardiology, PICU, Anaesthesia, and Perfusion. The exercise focused on enhancing communication and response during ECMO (extracorporeal membrane oxygenation) scenarios which is a critical intervention for heart and lung support during cardiac arrest. The new manikin provided a highly realistic and immersive training environment, enabling teams to identify and address gaps in communication and workflow.

As a result, the PICU successfully conducted a full-scale ECPR (Extracorporeal Cardiopulmonary Resuscitation) simulation involving over 20 clinicians, with further sessions planned. The training improved team communication, coordination, and confidence in initiating ECMO during cardiac arrest, while also establishing a structured simulation-based training pathway. Smaller, regular simulations are now being introduced to address specific learning needs identified in the initial session.

Voices of Impact

“The new manikin has made our training so much more realistic. During the ECMO scenario, we were able to practice as if it was a real patient, which highlighted areas we could improve as a team. That kind of learning is invaluable when the stakes are so high in real life.”

PICU Nurse, Children's Health Ireland

“Being able to train in a full interdisciplinary setting meant we weren't just practising our individual roles, but also how we communicate and coordinate as a team. I feel more prepared and confident to respond if an ECMO situation arises in PICU.”

Consultant Anaesthetist,
Children's Health Ireland

“We are deeply grateful for this funding, which has significantly enhanced our simulation training capacity. The grant has empowered our team to overcome previous limitations and directly improve the quality and safety of paediatric patient care.”

Sunimol Joseph, PICU,
Children's Health Ireland, Crumlin

Bili-Meter Reading Device

Children's Health Foundation funded the purchase of a new Bili-Meter for the Children's Heart Centre at Children's Health Ireland, Crumlin. The Bili-Meter is a non-invasive device that measures bilirubin levels through the skin, making it especially well-suited for newborn babies and vulnerable infants. Its introduction has transformed the way staff monitor jaundice in cardiac patients, providing faster, more accurate results while improving family reassurance.

Previously, staff had to borrow Bili-Meters from other neonatal units, creating delays in assessment and uncertainty for families. In addition, nurses had not received structured training in its use, which limited confidence and consistency in practice. Thanks to donor support, CHF funding enabled both the acquisition of the new device and comprehensive staff training ensuring confident, accurate use across the team.

Impact of our Funding

Improved Accuracy and Timeliness

The Bili-Meter delivers quick, reliable results, allowing clinicians to diagnose jaundice sooner and make timely treatment decisions for infants with complex cardiac conditions.

Greater Efficiency

With a dedicated device in the Heart Centre, bilirubin assessments are carried out immediately, reducing delays and supporting faster interventions.

Consistent Standards of Care

Standardised training has ensured every nurse can use the device with confidence, meaning every child benefits from the same high-quality care.

Better Family Experience

Parents report reduced anxiety thanks to clearer communication, quicker assessments, and the confidence shown by staff when using the new device.

Voices of Impact

“When our newborn, Lily, was admitted with jaundice, we were so worried. But the nurses at the Children's Heart Centre used the new Bili-Meter right away, which gave us quick and clear answers about her bilirubin levels. They seemed so confident and efficient, explaining everything as they went. It felt like we knew exactly what was happening and what treatment she needed much faster, which really eased our anxiety during a stressful time.”

A Family in the Cardiology Department.

“The new Bili-Meter device has been invaluable. As a staff nurse, the training on it has made me feel so much more confident performing bilirubin assessments, knowing I'm using the device correctly and getting accurate readings. We didn't have to borrow the bili-meter from other areas. It's truly improved our daily practice, giving us a much better assessment and intervention tool for our cardiac patients.”

Staff Nurse, Children's Health Ireland hospitals and urgent care centres.

Groundbreaking Research

Through the benevolence of our supporters, we invested €1.6 million in more than 25 groundbreaking research initiatives designed to improve patient outcomes across all Children's Health Ireland hospitals and urgent care centres.

From supporting new discoveries to sustaining ongoing research, these efforts are driving meaningful improvements in care and service delivery across all Children's Health Ireland hospitals and urgent care centres.

Children's Health Foundation is proud to support research that leads to lasting impact for children's health in Ireland and beyond.

Research and Innovation Grants 2024

57 research and innovation grants were awarded, including:

- 5 National Children's Research Centre Grants
- 5 Temple Street Foundation Grants
- 37 CHI Seed Funding Projects
- 1 CHI Cardiology Professorship
- 9 Research Ireland awards

Impact – Advancing Treatments for Childhood Illness

- **Cancers and Heart Disease**
Leukaemia, Neuroblastoma, Osteosarcoma, Congenital Heart Disease
- **Chronic Conditions**
Cystic Fibrosis, Epilepsy, Asthma, IBD
- **Rare and Genetic Disorders**
22q11 Deletion Syndrome, Craniosynostosis, Neurogenetic and Metabolic Disorders
- **Brain Injury**
Neonatal and Traumatic Brain Injury

Supported Researchers and Innovators

The grants supported a diverse network of 118+ researchers and innovators, including:

- **84 lead and co-investigators**
(academic and clinical supervisors) driving cutting-edge studies.
- **12 clinical and academic research fellows**
(MD, MSc, PhD students) advancing their research careers in children's health.
- **Specialist teams** of postdoctoral researchers, research nurses, assistants, and coordinators working directly with young patients and families.
- **Dedicated roles** in biostatistics, patient and public involvement (PPI), and innovation design ensuring research is rigorous, patient-centred, and impactful.

84 lead and co-investigators

12 research fellows

What Matters to Me: Changing the Conversation in Nursing Handover

Project Leads: Joppa Lynn Paris, CNM2, Maple Ward and Jacquie Lyons, CNM3

Thanks to donor support through the Children's Health Ireland Innovation Seed Funding programme, a new approach to nursing handover is transforming how care is communicated and experienced. A dedicated team of nurses working with parents and young advisors reimaged the traditional process. Now, instead of happening behind closed doors, handovers take place at the bedside with patients and families as active members of the care team.

Nurses use the ISBAR3 framework and a "What Matters to Me" communication board to guide conversations, ensuring clinical safety while also centring what children and families want and need.

The results are clear. On Maple Ward, 100% of nurses value including parents in the handover process with 92% of families report greater satisfaction and, more importantly, a new sense of trust and involvement.

As one parent shared:

"It gave me confidence and trust in the team. I felt empowered with the knowledge of exactly what others knew about me and my son."

This innovative approach is now expanding, with early rollouts underway in Children's Health Ireland Temple Street and Children's Health Ireland Crumlin. A handover toolkit has been created to support wider adoption, laying the foundation for a consistent model across the new National Children's Hospital. What began as a pilot project on one ward is now set to scale up to potentially transform the experience of care for over 25,000 families every year, proof that small clinically led projects, backed with the right support, can drive extraordinary change.

Making every Referral Count:

Transforming Access for Children with Craniofacial Conditions

Every year, the National Paediatric Craniofacial Centre (NPCC) at Children's Health Ireland, Temple Street receives hundreds of referrals for children with concerns about the shape of their head or face. These can range from congenital skull differences to trauma-related injuries. Accurate triage is critical: the sooner a child who truly needs specialist care is seen, the better their outcome.

In 2019, the NPCC team introduced a simple but powerful change—asking referrers to include photographs with head-shape referrals. The impact was immediate: fewer unnecessary appointments and shorter waiting times for children who needed specialist care. But challenges remained. Photos often arrived late, separately, or had to be matched manually with referrals, making the process time-consuming and unreliable.

Thanks to funding from Children's Health Foundation's Innovation Seed Funding

programme, and the generosity of donors who made it possible, the team co-designed a new electronic referral system. This guides referrers through an interactive form, complete with visual prompts to help them describe a child's condition more accurately. A secure photo-upload app allows parents or referrers to send images that are automatically matched to the correct referral using a unique code.

This innovation reduces stress for families, saves time for staff, and most importantly ensures that children with serious conditions are seen sooner.

Now launched nationally, with early clinical feedback highly positive, this project demonstrates how smart, clinically led ideas when backed by donor support can transform access and outcomes for children and families.

Increasing Diagnostic Rates for Children with Rare Neurological Conditions

At Children’s Health Ireland, Crumlin, Consultant Neurologist Dr Susan Byrne and Consultant Clinical Geneticist Dr Janna Kenny are leading the EpiFUN (Epidemiology of Children with Undiagnosed Neurogenetic Disorders) research programme. Their goal is to increase diagnosis rates for children with suspected neurogenetic conditions by combining advanced technologies with collaborative expertise.

The team was awarded Research Innovation Funding to establish the CINDI Registry (Collaboration of Intervention in Genomic Disorders in Ireland). This secure research database collects detailed patient information including medical histories, genetic profiles, and outcomes on children with both known and unknown diagnoses. It provides a vital platform to identify children who may benefit from advanced genomic testing and, in the future, clinical trials or precision therapies.

The EpiFUN programme reanalyses commercially generated sequencing data using advanced tools such as the FutureNeuro pipeline, long-read genome sequencing, and transcriptomics. Findings are discussed by a multidisciplinary team, and where a likely diagnosis is identified, it is confirmed in an accredited laboratory. This approach is already helping families receive clearer answers, better counselling, and in some cases, access to treatment options.

Voices of Impact

“The CINDI registry forms the foundation for our work. It allows us to identify children without a

genetic diagnosis and include them in advanced research studies, while also ensuring we can rapidly recognise children with known conditions should new therapies or trials become available.”

Dr Susan Byrne, Consultant Neurologist, Children’s Health Ireland at Crumlin

“By engaging with families, clinicians, and data specialists during the design of the registry, we created a tool that reflects real patient needs. It’s already helping us bring advanced diagnostic techniques to children who previously had no answers.”

Dr Janna Kenny, Consultant Clinical Geneticist, Children’s Health Ireland at Crumlin

The team’s work has already been recognised, winning Best Clinical Poster at the Irish Society of Human Genetics meeting in September 2024. Looking ahead, they aim to expand the CINDI registry, grow recruitment to the EpiFUN study, and link with the European Rare Diseases Research Alliance (ERDERA) a European-wide initiative dedicated to improving diagnoses in genetic diseases.

With donor support, this research has the potential to transform the journey for children with rare neurogenetic conditions bringing quicker diagnoses, improved care pathways, and greater hope for families.

Pioneering Research into Pandemic-Era Childhood Development:

From CORAL to FLORAL

Children’s Health Foundation supported the CORAL study (Impact of Coronavirus Pandemic on Allergic and Autoimmune Dysregulation in Infants Born During Lockdown), a groundbreaking project led by Professor Jonathan Hourihane, Consultant Paediatrician at Children’s Health Ireland and Head of Paediatrics at RCSI University of Medicine and Health Sciences.

The study followed a cohort of infants born during the first COVID-19 lockdown. Using parent questionnaires, clinical samples, and allergy testing, researchers tracked diet, home environment, infections, and microbiome development from birth to age two.

The results were remarkable. Despite fears that lockdown-related isolation might harm early development, CORAL found unexpected benefits, including:

- A more diverse and healthier gut microbiome, likely linked to extended breastfeeding.
- Fewer infections and reduced antibiotic use.
- Lower-than-expected rates of food allergies and eczema.

As Professor Hourihane explained:

“CORAL was the only study of its kind globally, and its findings challenged assumptions about pandemic-era infant development. It also raised important new questions.”

Building on Success: The FLORAL Study

Building on CORAL’s success, Professor Hourihane and his team are now leading the FLORAL study (Follow-On to CORAL), supported by significant funding from Research Ireland. FLORAL will:

- Re-examine the CORAL children at age five to see if early health benefits continue as they start school.
- Recruit a new cohort of 1,000 infants born between March and May 2025 across Dublin’s three main maternity hospitals The National Maternity Hospital (Holles Street), The Rotunda, and The Coombe for comparison with the “pandemic babies.”
- Collaborate with Professor Liam O’Mahony at APC Microbiome Ireland (UCC) to analyse immune development and allergy risk by identifying key microbiome patterns across both groups.

Parents as Partners

A unique aspect of FLORAL is its emphasis on public engagement. Two parent volunteers from the original CORAL cohort are now part of the research team, ensuring findings are communicated clearly to families and that the study remains grounded in the needs of the community it serves.

By investing in pioneering research like CORAL Children’s Health Foundation donors are helping to advance global understanding of childhood development. This work not only improves healthcare for children today, but also shapes healthier futures for children in Ireland and around the world.

Spreading the Joy of Christmas

Christmas can be an especially difficult time for children in hospital, particularly those living with long-term health conditions. Many families are unable to be together at home, which can lead to feelings of isolation, sadness, and anxiety.

For a child, spending Christmas in hospital can feel overwhelming; far from home, loved ones, and the festive spirit of the season. That's why we fund a range of initiatives across Children's Health Ireland hospitals and urgent care centres to help bring joy, comfort, and a sense of magic during the holidays.

Christmas Light Up

The Christmas Light Up project is aimed to bring love, laughter and the magic of Christmas to the patients across Children's Health Ireland hospitals and urgent care centres. Children's Health Foundation sponsored the Christmas lights and festive decorations used in the Christmas Light Up, to bring a sense of normalcy and holiday spirit to patients and their families during a difficult time.

Christmas Jumper Day

Christmas is often tagged as the most wonderful time of the year and for many across Children's Health Ireland, our 2024 Christmas Jumper Day brought that sentiment to life.

Over 500 cheerful supporters across Ireland and beyond pulled on their boldest, brightest, and most brilliantly bad jumpers all in the name of a great cause. The 2024 Christmas Jumper Day, hosted by Children's Health Foundation, brought a wave of festive spirit and heartfelt generosity, raising vital funds to support sick children in Children's Health Ireland hospitals and urgent care centres across Ireland.

From glittering snowflakes to jingling reindeer, workplaces, schools, and community groups embraced the fun of dressing up with purpose. Among our amazing supporters was the team at Penney's who joined in the festive cheer by gifting pyjamas from their Late Late Toy Show Collection to young patients across Children's Health Ireland sites.

Each donation from this campaign helps fund essential paediatric equipment, life-saving research, and patient and family support services at Children's Health Ireland hospitals and urgent care centres, including Crumlin, Temple Street, Tallaght, and Connolly. Behind every stitch and sequin was a shared message of hope: that together, we can help sick children smile even during their toughest days. A message of hope that our long-term patients like Grace need.

In January 2024, ten-year-old Grace went to school, dance, and gymnastics as usual. She was chatting to her coaches when she suddenly sat down, held her head, and began to have a seizure. Grace had never had a seizure before.

Fortunately, her gymnastics coach is a doctor in St Vincent's hospital and contacted

emergency services straightaway. Grace was brought to Children's Health Ireland at Crumlin, where scans showed a bleed on the left side of her brain. She was then transferred to Temple Street for emergency brain surgery.

Prof. Darach Crimmins was the neurosurgeon on duty. After the surgery, he told Grace's parents: "What I'm going to tell you is every parent's worst nightmare. Grace is a very, very sick little girl." They found a bleed caused by an Arterial Venous malformation (AVM). The AVM was too deep to surgically remove, so drains were placed in her head to relieve pressure. She was placed in an induced coma to help her brain stabilise.

Four days later, Grace opened her eyes for the first time. She could only move one hand and had no speech, communicating with thumbs up or down. Two weeks later, she said her first words: "hi" and "I love you." Shortly afterwards, the drains were removed and Grace began using a hoist and then a wheelchair, giving her access to the schoolroom and therapy rooms. Staff lined the corridor in a guard of honour, clapping as she moved through the ward.

Grace's recovery went from strength to strength thanks to her physio, occupational therapist, and speech therapist. She spent nine days in ICU and fourteen weeks in Temple Street. In May, Grace was discharged, leaving hospital on a crutch. She then began a ten-week journey in the National Rehabilitation Hospital.

Grace's story reflects that of many children who have spent time in hospital during the festive season. Thanks to the generosity of our supporters who participated in Christmas Jumper Day 2024, we were able to bring the magic of Christmas to Children's Health Ireland hospitals and urgent care centres, helping to spread joy and lift the spirits of little patients.

Community in Action: Championing Sick Children Together

At Children's Health Foundation, our supporters are at the heart of everything we do. In 2024, thousands of people across Ireland and beyond came together in creative, challenging, and heartfelt ways to raise funds for sick children. From baking cakes and running marathons to crossing continents on motorbikes, these incredible efforts directly

funded life-saving care, pioneering research, and vital equipment at Children's Health Ireland hospitals and urgent care centres.

Every euro raised, every mile walked, every event organised represents not just generosity but a deep, shared commitment to brighter futures for children.

The Great Irish Bake

The Great Irish Bake 2024 raised an outstanding €170,728, uniting cake-lovers nationwide through the joy of baking and the power of giving. With strong support from award-winning food writer and TV presenter Donal Skehan, generous sponsorship from Gem, and touching patient stories the campaign reached thousands across Ireland. All funds raised supported Children's Health Ireland hospitals, making a tangible difference in the lives of children and families. The Great Irish Bake continues to be a joyful, meaningful event that connects communities with the real impact of their support.

Marathons

An incredible 180 women took part in the Women's Mini Marathon raising a total of €84,782, and 24 participants took part in the Dublin Marathon, raising €91,957. We also had supporters run in the New York Marathon, Tokyo Marathon, Manchester Marathon, Great Limerick Run, Connemara Half, Connemara 100, Kerry Ultra, Vancouver Marathon, Tallinn Marathon, Cork City Marathon and many other challenging events.

Route 66 Challenge

In September 2024, more than 90 dedicated motorcyclists embarked on an unforgettable journey - the Route 66 Challenge. Covering over 2,400 miles from Chicago to Santa Monica, this coast-to-coast ride across the United States raised a phenomenal €739,768 for Children's Health Foundation. These funds are helping to advance life-saving care, ground-breaking research, and essential equipment across CHI hospitals and urgent care centres. The Route 66 Challenge remains one of our most inspiring and high-impact fundraising events, a powerful example of what's possible when community and compassion hit the road.

Corporate Partner Highlights

Tesco

We were proud to continue our valued partnership with Tesco in 2024. Their ongoing commitment to supporting sick children and their families has had a meaningful impact once again this year as we celebrated 10 years of partnership. A key highlight was the release of Simon the Sloth, Tesco's 2024 Christmas teddy, designed by young supporter Oisín. Since 2018, these limited-edition teddies have become a beloved tradition, with proceeds helping to fund vital services for children in hospital. We're incredibly grateful to Tesco and its customers for their continued generosity and support.

INTO

The Irish National Teachers' Organisation (INTO) and Children's Health Foundation have shared a meaningful partnership for over 30 years, united by a belief that every sick child deserves every chance. In 2024, INTO's generous funding enabled the launch of the PLATYPUS research project, a vital three-year study focused on improving the detection and treatment of infection in premature babies, giving them a better chance of survival. This ongoing support reflects INTO's deep and lasting commitment to the health and well-being of children across Ireland, now and into the future.

Google UKI LCS

We welcomed the Google UKI LCS team as a new partner in 2024. Through their Champions for Children's Health programme, the team's creativity and dedication to improving the lives of sick children has already made a meaningful impact raising almost €50,000.

Annual Report and Financial Statements

Director's Report

The Directors of Children's Health Foundation (CHF) present this report, together with the audited financial statements, for the year ended 31 December 2024.

Children's Health Foundation is a registered charity with the principal objective of raising funds to support the work of Children's Health Ireland at Crumlin, Temple Street, Tallaght and Connolly and paediatric Research and Innovation, to ensure their facilities remain the best in class and that they have the necessary funding to continue research into new treatments and cures for paediatric illnesses and diseases.

Principal Activities

Children's Health Foundation is guided by four key strategic pillars:

1. Deliver sustainable income growth
2. Nurture all stakeholder relationships
3. Maximise our impact and
4. Enhance our organisational health

Objectives and Outcomes

A review of the objectives and corresponding outcomes for Children's Health Foundation for 2024 follows under four headings:

1. Deliver Sustainable Income Growth	
Objectives and Priorities	Performance and Outcomes
Engage in effective activities	<ul style="list-style-type: none">Fundraising Policy and Supporter Charter reviewed and updated.Appointment of Director of Development.Regular review and analysis of all fundraising activities.
Conscious focus on costs	<ul style="list-style-type: none">Decrease in overall fundraising costs.Regular review of return on investment on all projects and ensuring a balanced income base.Streamlining of suppliers and procurement processes.
Continuously grow new supporter pipelines	<ul style="list-style-type: none">Invested in the recruitment of new supporters through additional face to face fundraisers.Audience Growth of 5.5% to 91,858 followers. Total new followers gained 4,840.Out of home media for cross organisational campaign for Christmas 2024.

2. Nurture all Stakeholder Relationships	
Objectives and Priorities	Performance and Outcomes
Drive best-in-class communication/ feedback mechanisms	<ul style="list-style-type: none">4 major donor events were held in 2024.GAP roadshows carried out across the hospital sites.Over 26,000 supporter surveys were issued in 2024.
Deliver brilliant supporter experience	<ul style="list-style-type: none">Developed a new Supporter Services function.Enhanced website’s donation journey.New call campaign undertaken to improve supporter stewardship.
Continuous nurturing of our relationship with Children’s Health Ireland	<ul style="list-style-type: none">Revised Memorandum of Agreement with Children’s Health Ireland signed in 2024.

3. Maximise our Impact	
Objectives and Priorities	Performance and Outcomes
Allocate funds to improve outcomes for sick children	<ul style="list-style-type: none">Undertook grant applications and strategic alignment task processes for 2024.€5.3m funds disbursed to projects and research in 2024.
Communicate our impact clearly	<ul style="list-style-type: none">New Head of Impact role was appointed.Increased communication with our regular givers, with post and email engagement up an average of 18.8%.Website traffic grew 38% in total visits.Social media achieved 17.8 million impressions (+128.6%) and more than doubled engagements to 543,767 (+143.1%).
Build our brand	<ul style="list-style-type: none">Established our Hub at the Crumlin hospital site.Successful Christmas campaign carried out across all four hospital sites.
Develop a data driven framework to measure success	<ul style="list-style-type: none">Review of CRM system (Salesforce) to maximise its potential.Regular reviews and analysis of Irish Charity Engagement Monitor and Foundation’s performance.

4. Enhance our Organisational Health	
Objectives and Priorities	Performance and Outcomes
Value our people	<ul style="list-style-type: none">Leadership programme delivered to Heads of Departments.Team wide well-being and resilience training.Employee Assistance Programme reviewed and communicated to the team.5 staff events organised by our social committee.
Learn from continuous feedback	<ul style="list-style-type: none">Skip level meetings encouraged among teams.New KPI and annual review process introduced.Information sharing through drop-in clinics and workshops.
Create efficiencies to improve our processes	<ul style="list-style-type: none">External review of organisational processes.Completed quarterly reviews of organisational risks.
Empower our people by investing in systems and trainings	<ul style="list-style-type: none">Training grant available for professional development.Team wide training on the New Ambition for the Foundation.External learning platform implemented for teamwide training opportunities.Skill set analysis conducted across the organisation to identify gaps and opportunities.Review of finance operating and grants management systems.

Achievements & Performance

Charitable Activities

In partnership with Children's Health Ireland, the Foundation continue to place priority on investments that will have the greatest impact and meet the immediate needs for sick children in hospital in Ireland.

Children's Health Foundation raises funds to support our core pillars of funding;

- Life changing research,
- Vital life-saving equipment,
- Patient staff and parental support services,
- Ward and New service development.

In 2024, the Foundation made a transformative impact by disbursing €5.3m across Children's Health Ireland hospitals, urgent care centres and key research partners including Research Ireland and the National Children's Research Centre now known as Research and Innovation Office (RIO) at Children's Health Ireland.

Some highlights on the impact these funds over the last year include:

€1.6m invested in Life changing research

- 16 new Seed Funding grants awarded via RIO to ignite pioneering child health research and innovation across all Children's Health Ireland sites.
- 3 research projects supported by CHF through a co-funding partnership with Science Foundation Ireland (SFI) on the SFI Frontiers of the Future project stream, 1 co-funded and 2 fully funded by CHF. SFI and CHF funded research for 'Molecular mechanism and therapeutic potential of chromatin dysregulation in paediatric sarcomas'.

€2.1m dedicated to Vital equipment

- €325k for purchase tandem mass Spectrometer analyser.
- €169k for Acquisition of an Endoscopic Ultrasound.

- €134k for purchase of ENT Microscope in Clinical Engineering Theatre.
- €48k for a Liquid Handling Robot.

€1.4m on patient staff and parental support services

- €70k disbursed on Education, Training and Conferences for staff members across Children's Health Ireland.
- Enhanced patient and family experience through support programs including the Giggle Fund, birthday, and reward initiatives, play equipment, and seasonal events.
- Provided critical funding for family support services such as parent accommodation, medical social work, palliative care grants, hardship funds, and travel bursaries for liver patients.

€0.2m on Ward and New service development

- €237k disbursed for new services including initiatives like Sensory Hub for OPD and Phlebotomy and Therapy Garden for St Louise's Unit and The Laurels Unit,

creating environments that nurture healing and comfort.

- Invested in innovative new services and facilities such as LED sky ceilings at the Laurels Clinic and a new Audiology room at St Frances Clinic Courtyard.

In 2024, a total of **265 grants** were drawn down, delivering critical support across key areas of care and innovation:

- **25 grants** enabled pioneering research to advance treatment and understanding of childhood illness.
- **64 grants** funded the purchase of vital, lifesaving equipment, ensuring children receive the highest standard of care.
- **164 grants** supported patient and family services, providing comfort, compassion, and practical help during the most challenging times.
- **12 grants** were dedicated to redevelopment and new service initiatives, transforming hospital environments and expanding access to care.

Fundraising Activities

Once again, supporters of sick children and their families were overwhelming in their generosity in 2024. An incredible €17.2m was raised through donations, legacies and fundraising campaigns with the Irish public finding new and unique ways to show up on behalf of children in hospital.

New ways of connecting with donors and supporters continued to be our aim as we focused on improving our CRM data, our digital journeys and testing new ways of connecting and engaging different supporter segments.

Despite the cost of fundraising initiatives increasing due to inflation, we had a tight focus on costs which ensured we reduced the overall cost of fundraising in 2024, resulting in more income being available to support our charitable endeavours.

Our campaigns are a great way of engaging with the public and reminding them of the need to support sick children. Our annual **Great Irish Bake**, in its 16th year, successfully mobilised bakers nationwide with their baking and creative skills. We were once again grateful to our ambassador Donal Skehan and sponsor Gem for their support.

At Halloween, we held our annual **Trick or Treat** for sick children campaign, and we were delighted to have MiWadi as our sponsor again in 2024. Trick or Treat remains an iconic campaign in our Foundation's annual calendar, Patient Méabh led 1200 supporters taking part around the country.

Christmas Jumper Day saw over 400 supporters across Ireland don their most festive jumpers during the week of 9th December to raise vital funds for sick children.

Meanwhile, our **Car raffle** and **Christmas Raffles** were a resounding success, raising an impressive €880k to support sick children. This included the chance to win a brand-new Hyundai i10 and a €10,000 cash prize, with the draw conducted by one of our patient superstars, Brody. The Foundation extends heartfelt thanks to all participants, sellers, and supporters for their generosity and commitment to improving the lives of young patients.

In 2024, we were proud to work with a wide range of individuals and groups who took on everything from abseils and motorcycle rides to tractor runs, head shaves, fitness challenges, and countless other imaginative fundraisers.

180 supporters took part in the **Women's Mini Marathon**, 24 in the **Dublin marathon** and as well as local support, we had representatives in **New York, Tokyo, Manchester, Vancouver and Tallinn marathons** enduring all kinds of conditions and personal achievements to support sick children in hospital.

A highlight of the fundraising year came in September when more than 90 dedicated motorcyclists hit the open road for Children's Health Foundation's iconic **Route 66 Challenge**, riding coast-to-coast across the United States in support of sick children in Ireland. This unforgettable journey, spanning over 2,400 miles from Chicago to Santa Monica, raised an incredible €739,768 to support life-saving care, ground-breaking

research, and vital equipment. The Route 66 Challenge continues to be one of our Foundation's most impactful and inspiring fundraising events, powered by the commitment of an extraordinary community of riders and supporters.

Increasing our pipeline of regular donors continued in 2024 with our face-to-face recruitment campaign exceeding its target by 15%. We also achieved a 37% conversion rate on our tax top-up campaign which placed additional donations into the tax effective giving threshold.

Support from our corporate partners continued to remain strong in 2024, with ongoing support from several long-standing corporate partners including One4All, Penneys and Johnson & Johnson. Tesco's ten-year commitment has been remarkable, with their customers and colleagues having donated over €10 million. Their generosity has enabled the purchase of critical diagnostic and treatment equipment that has directly helped Children's Health Ireland patients to achieve better health outcomes. New partnerships in 2024 included West Pharma, Aerogen, Pure Telecom, Q Park, Woodies, Google and IQEQ,

Across Major Giving and Trusts and Foundations there were some significant gifts including those from Smurfit Kappa Westrock, JP McManus Foundation and the O'Flaherty Family Foundation.

Financial Review

Fundraising Income for the year of €17.2m plus €0.5m from investments, after expenditure of €12m, resulting in a net income of €5.8m being available to carry forward for future commitments. A detailed commentary on the financial results is set out below.

Income

Fundraising income for the year of €17.2m was an increase on the previous year of €1.5m. The split of our fundraising income was as follows:

Expenditure

Expenditure is classified between expenditure on raising funds, charitable activities and governance costs that are further explained in Note 1. Expenditure on raising funds was €6.1m for the year compared to €5.7m for the previous year.

Investments, Investment Policy and Governance

The Finance, Audit & Risk Committee of the Board regularly reviewed the financial performance of the Foundation including the performance of its investments. It was the policy of the Board that all funds not immediately required for operational purposes should be appropriately invested - either in deposit accounts with reputable financial institutions, for funds that may be required in the shorter term; or, with major Irish investment managers, for those funds not required in the short term.

Children's Health Foundation's investment managers are listed in the information section of this report. Quarterly reports were received from those investment managers during the year.

Funds Employed and Financial Position

Total Reserves of the Foundation at year end were €42.5m. Of this total €16.1m was designated for projects approved by the Board and not paid by the year end to the hospitals and €12.8m was held in restricted funds to support specific projects and activities as decided by supporters. The balance of reserves of €13.6m was unrestricted, of which approximately €1.8m is required as a minimum reserve based on the Board's reserves policy to hold six months' running costs of the Foundation for times of emergencies and uncertainties. This left €11.8m at year end available for commitments for 2025 and onwards.

As we fund commitments in the future from current reserves this ensures a sustainable funding model for sick children and reduces the exposure to the effect of economic shocks, and scenarios such as the pandemic on fundraising income. The Board therefore were satisfied that the Foundation was reasonably placed to meet its future commitments.

Plans for the Future

Short Term Plans (2025)

In the year ahead, in keeping with our strategy for 2025-2027, we look forward to continuing to plan for the future of Children’s Health Foundation which will change significantly with the opening of the new National Children’s Hospital. Until that point, our focus will also remain on being dedicated to supporting staff and children across the current hospitals and urgent care centres.

Our strategic plan also has a strong focus on continuing to build the foundations of our relatively new organisation, ensuring we have the correct processes, tools and people to enable the Foundation to grow and support more sick children and their families, more healthcare workers and more paediatric research. We will continue to deepen our working relationship with our Children’s Health Ireland colleagues and identify new areas of unmet need for our supporters to fund. Our supporters and volunteers are the only reason we can exist as an organisation, and we will be focused on engaging with them as we transition into new ways of working across a new hospital site and across new ways of driving support for sick children.

Long Term Plans

At Children’s Health Foundation, our commitment remains focused on ensuring that sick children and their families have access to the best possible care, comfort, and hope. This is only possible through strong partnerships with our healthcare and research colleagues, whose support helps us expand our impact in meaningful and measurable ways.

Children’s Health Foundation will continue to grow grant making efforts, reaching more children and families through targeted funding calls across Children’s Health Ireland hospitals and urgent care centres. The Foundation will invest further in pioneering paediatric research, with a clear focus on improving health outcomes for this generation and the next. To ensure the greatest possible impact, we will maintain strict financial efficiency, directing the maximum amount of funds raised towards frontline care, services, and innovation. We also recognise the importance of demonstrating the difference we make, and will continue to enhance how we measure, evaluate, and communicate our impact.

Partnerships will play a central role in our future. We will continue to work closely with Children’s Health Ireland to align our efforts and accelerate progress. Through collaborations with research institutions such as Research Ireland, universities, and other children’s charities, we will strengthen our ability to respond to complex needs and deliver even more for sick children and their families.

Operational excellence underpins everything we do. We are committed to maintaining the highest standards of governance, while also investing in our systems and skillsets to unlock our full potential. Our team is at the heart of our success, and we will continue to foster a workplace culture that is inclusive, purpose-driven and people-centred. In everything we do, we aim to provide exceptional service to our supporters and stakeholders, building lasting trust and connection.

We are also laying the foundations for ambitious growth. This means developing a more varied and sustainable income portfolio that can withstand economic shifts and funding challenges. We will focus on growing our base of direct supporters and ensuring that every fundraising activity is cost-effective, strategic, and impactful. At the same time, we are committed to cultivating an agile, innovative culture where ideas can be tested, refined, and scaled.

Finally, we are evolving the personality and identity of Children’s Health Foundation to meet the needs of the future. We aspire to be Ireland’s most recognised and trusted children’s charity, with a brand that truly reflects our values and the people we serve. By delivering exceptional supporter experiences and empowering our employees, volunteers, and beneficiaries to become champions of our mission, we will strengthen the connection to our cause.

Together with our community of supporters, patients and their families and healthcare partners, we will continue to drive change, deliver hope, and improve lives of sick children.

Events After the Reporting Date

There were no significant events since the balance sheet date.

Going Concern

Based on our assessment of current trends and forecast activities and taking into account our best estimate of the impact of the current economic climate, the Board has a reasonable expectation that the Foundation has adequate resources to continue in operational existence for the foreseeable future. Thus, we continue to adopt the going concern basis in preparing the annual financial statements. Further details regarding the adoption of the going concern basis can be found in note 2 of the Financial Statements.

Structure, Governance and Management

Governing Document

The Foundation is an Irish company incorporated in 2019 under the Companies Act. It is a company limited by guarantee with no share capital with Ministerial consent to omit limited from the title. The Foundation is governed by a constitution.

The core charitable objectives for which the Foundation is established, are:

- i. to foster, promote and advance the work of any children's hospital or hospitals in Ireland in providing in-patient and out-patient medical care of the highest standard in a physical and cultural environment designed to minimise the emotional stress of childhood illness for patients and their parents or guardians.
- ii. to promote, foster and finance medical and scientific research into childhood illnesses, health and well being, to save and improve young lives.

Board of Directors, Officers, and Management

The Foundation is governed by a Board of Directors who serve in a voluntary capacity. The Board consists of a Chair and up to eleven Directors.

The Foundation-approved policy on Board tenure is as follows:

- 1. The term of office of a director is three (3) years.
- 2. A Director may be reappointed for up to a further two successive terms of three (3) years (being a maximum consecutive period of nine (9) years).
- 3. No person shall be entitled to be appointed as a Director for more than nine (9) years in succession.

The Board, on its initiative and on an exceptional basis, may exercise discretion to extend the maximum terms specified where it considers that such an extension would benefit the Foundation. Such discretion will be exercised on an annual basis and the Director concerned will be required to stand for re-election annually. The 2024 Directors and Chair are listed on page 11.

The Directors and secretary, who served during the year except as noted for appointments and resignations are as follows:

- Mark Moran (Chair)
- John Chase
- Julia Davenport
- Eilish Hardiman (resigned 3 September 2024)
- Owen Hensey
- David McCann (resigned 31 August 2024)
- Sinead McSweeney (resigned 28 November 2024)
- David Phelan
- Brendan Jennings
- Onnah McCrann
- Anne Kilgallen (appointed 3 September 2024) (Resigned 18 July 2025)

Company Secretary
Cara Secretaries Limited

Board Committees
To support the Board, there are two sub-committees, each of which have a clearly defined Terms of Reference, chaired by a Board member and include subject-matter experts where appropriate:

- 1. Finance, Audit and Risk Committee
- 2. Governance and Remuneration Committee

The Finance, Audit & Risk Committee assists the Board in fulfilling its responsibilities by providing an independent review of financial reporting and assisting the Board with, and overseeing, the Board's financial responsibilities. The Committee is responsible for all matters relating to the financial affairs of Children's Health Foundation and will provide the Board with an independent review of the budgetary process. The Committee also oversees the effectiveness of the risk management framework. The Committee includes two independent members with financial and investment expertise.

The Governance and Remuneration Committee supports the Board in fulfilling its governance obligations by providing an independent review of its legal and regulatory responsibilities, through the provision of adequate systems, policies and procedures, and to oversee overarching strategic and operational human resource issues ensuring that there is compliance with the relevant HR legal and regulatory requirement and adequate Board succession planning. In addition, it is responsible for ensuring that remuneration and reward practices are fair, responsible, and compliant with legal and regulatory requirements.

In order to ensure best Governance practice, the Board monitors conflict of interest and conflict of loyalties at each board meeting - all directors must declare any conflicts at the start of each Board meeting and any such conflicts are recorded in the minutes.

Accountability, Transparency & Best Practice

The Board is committed to maintaining high standards of corporate governance and believes that this is a key element in ensuring the proper operation of the Foundation.

There is a clearly defined division of responsibility between the Board and the Chief Executive who has responsibility for formulating strategy and policy within the parameters delegated to her by the Board.

To actively demonstrate openness, transparency and integrity to our beneficiaries and supporters, the Foundation operates under these three principles:

- **Transparent reporting**
The Foundation prepares an annual report and financial statements in accordance with the Charity SORP (Standard of

Recommended Practice under FRS102) and makes them available to the public on our website.

- **Good governance**
The Board signed off on the Children's Health Foundation, Charities Governance Code (issued by the Charities Regulator in November 2018) during the year for 2024 and has all records on file as required by the Charities Regulator.
- **Ethical fundraising**
The Foundation implemented all the requirements for the Statement of Guiding Principles of Fundraising in 2011 and continually reviews its performance against these principles.

The Board met 8 times during the year (the quorum for Board meetings is four Directors); the Finance committee met 4 times during the year; the Governance Committee met 3 times during the year with attendance (and eligibility) for all as follows:

Directors	Board Meetings	Finance, Audit & Risk Committee	Governance & Remuneration Committee
Mark Moran	8(8)	3(4)	3(3)
John Chase	5(8)	2(4)	n/a
Julia Davenport	7(8)	n/a	2(3)
Eilish Hardiman	4(5)	n/a	n/a
Owen Hensey	6(8)	n/a	n/a
David McCann	4(5)	1(2)	n/a
Sinead McSweeney	5(7)	n/a	n/a
David Phelan	6(8)	n/a	3(3)
Brendan Jennings	8(8)	4(4)	n/a
Oonah McCrann	8(8)	n/a	3(3)
Anne Kilgallen	1(2)	n/a	n/a
FARC Representative 1	n/a	4(4)	n/a
FARC Representative 2	n/a	4(4)	n/a

Management, setting pay and remuneration

The Board delegates the day-to-day management of the Foundation to an executive management team under the leadership of a Chief Executive Officer (CEO). Matters such as policy, strategic planning, and budgets are drafted by the executive management team for consideration and approval by the Board, who then monitor the implementation of these plans.

The Foundation sets remuneration for all staff based on averages within the not-for-profit sector and a benchmarking exercise was conducted by an external stakeholder in 2024.

Remuneration of the Board

The members of the Board cannot, under the governing documents, receive remuneration for services to the Foundation and may only be reimbursed for incidental expenses claimed. There were no expenses paid to any Directors in the year (2023: €nil).

Lobbying and Political Contributions

There were no political contributions in 2024 (2023: Nil).

Risk Management and Internal Control

The Finance, Audit and Risk Committee have oversight of risk on behalf of the Board of Directors. They set the policy and procedures in relation to risk for the Foundation. The committee completes a detailed review of the risk register at least biannually at committee meetings and presents the red (high) risks at every board meeting. Risk management is factored into the Foundation's operational planning, performance management, audit, and monitoring.

Risks are split between seven main categories as defined by the Charities Regulator Authority (CRA): Governance, strategic, compliance, operational, financial, reputational, and environmental risks.

The table below describes each risk category setting out the risk appetite and the guiding principles to treat each category.

Category	CHF Appetite	Description	Mitigation (Actions to treat the risk)
Governance	Averse	Focus on strong governance ensures Children’s Health Foundation has the highest standards of transparency and oversight by the Board of Directors into how funds are raised from the public and how those funds are disbursed for maximum impact for sick children.	Governance & Compliance Lead in place to ensure regular monitoring and review of policies and procedures against legislation and standards. The Board sub-committee on governance meets regularly to focus on new policy development, to review and sign off on the CRA Governance Code, and to consider any changes in legislation or standards which will require changes to policy or procedures in the Foundation.
Strategic	Bold	To set ambitious fundraising targets to deliver sustained and meaningful support for sick children in Ireland while being mindful of costs and commitments Children’s Health Foundation have undertaken.	Interim Strategic Plan 2024 developed to guide the organisation over 12-month period to help achieve our vision and mission. The Strategy details our strategic objectives and the actions needed to achieve them.
Compliance	Averse	If Children’s Health Foundation fails to comply with law or regulation, the Foundation may face a fine or other legal or regulatory action, resulting in a significant Public Relations and/or financial impact to the Foundation.	Ensuring that Children’s Health Foundation is governed in line with the CRA Governance Code, which is reported to the CRA annually and records are kept accurately and appropriately.
Operational	Balanced	Ensuring operational continuity and staff retention.	Upskilling of existing staff to negate reliance on a single individual for key operational tasks.

Category	CHF Appetite	Description	Mitigation (Actions to treat the risk)
Reputational	Averse	Negative Public Relations impacting on Children's Health Ireland and general enhanced scrutiny of governance in the charity sector can cause knock on reputational damage to Children's Health Foundation. Ongoing scandals in the charity sector impact all organisations.	Multiple streams of communication between Children's Health Foundation and Children's Health Ireland. Crisis communications plan in place to allow CHF to react quickly and positively should the need arise.
Finance	Balanced & Averse	Foundation's approach to investments is balanced and all other financial risk is averse. Rigorous financial controls and strong reporting in place with high integrity of results to ensure appropriate management of our portfolio of funds.	<ul style="list-style-type: none">• Grants Approval Process.• Development in alignment with Children's Health Ireland.• Continuous improvement of all finance process, including month end close, budgeting and forecasting, with details analysis.• Updating the approval matrix, improved segregation of duties, bank reconciliation processes.
Environmental External	Balanced	External factors can influence the progress of Children's Health Foundation and have a bearing on its fortunes, these are divided into two categories: Children's Health Ireland hospitals and general environmental.	<p>Children's Health Ireland Hospitals - Regular joint meetings now in place to ensure constant communication with Children's Health Ireland, as well as an agreed patient consent process across both organisations crucial for sharing patient stories.</p> <p>External environment - CRA Governance Code Compliance, and external audit to ensure that any potential external risks are identified and mitigated.</p>

Taking the above risks into consideration, the Board of Directors are satisfied that systems are in place to monitor, manage and mitigate major risks. These systems provide reasonable but not absolute assurance against the possible occurrence of these risks.

Staff and Volunteers

The Foundation acknowledges with immense gratitude the hard work, dedication and personal care and attention that its employees give to their roles daily.

Accounting Records

The measures that the directors have taken to secure compliance with the requirements of sections 281 to 285 of the Companies Act 2014 regarding the keeping of accounting records are the employment of appropriately qualified accounting personnel and the maintenance of computerised accounting systems. The company's accounting records are maintained at the company's business address, 14-18 Drimnagh Road, Crumlin, Dublin 12.

Statement on Relevant Audit Information

Each of the persons who are directors at the time when this Directors' report is approved has confirmed that:

- so far as the director is aware, there is no relevant audit information of which the company's auditors are unaware, and
- The directors have taken all the steps that ought to have been taken as a director in order to be aware of any relevant audit information and to establish that the company's auditors are aware of that information.

This confirmation is given and should be interpreted in accordance with the provisions of Section 330 of the Companies Act 2014.

Auditors

The auditors, Deloitte Ireland LLP, Chartered Accountants and Statutory Audit Firm, continue in office in accordance with Section 383(2) of the Companies Act 2014.

Approved by the Board and signed on its behalf by

Mark Moran, Chair
Brendan Jennings, Director

Date: 2nd October 2025

Directors' Responsibilities Statement

The directors are responsible for preparing the directors' report and the financial statements in accordance with the Companies Act 2014.

Irish company law requires the directors to prepare financial statements for each financial year. Under the law, the directors have elected to prepare the financial statements in accordance with FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland issued by the Financial Reporting Council ("relevant financial reporting framework"). Under company law, the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the assets, liabilities, and financial position of the Foundation as at the financial year end date and of the surplus or deficit of the company for the financial year and otherwise comply with the Companies Act 2014.

In preparing those financial statements, the directors are required to:

- select suitable accounting policies for the company financial statements and then apply them consistently.

- make judgements and estimates that are reasonable and prudent.
- state whether the financial statements have been prepared in accordance with the applicable accounting standards, identify those standards, and note the effect and the reasons for any material departure from those standards; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business.

The directors are responsible for ensuring that the company keeps or causes to be kept adequate accounting records which correctly explain and record the transactions of the company, enable at any time the assets, liabilities, financial position and profit or loss of the company to be determined with reasonable accuracy, enable them to ensure that the financial statements and directors' report comply with the Companies Act 2014 and enable the financial statements to be audited. They are also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The directors are responsible for the maintenance and integrity of the corporate and financial information included on the company's website.

Independent Auditor's Report to the Members of Children's Health Foundation

Report on the audit of the financial statements

Opinion on the financial statements of Children's Health Foundation (the 'company')
In our opinion the financial statements:

- give a true and fair view of the assets, liabilities and financial position of the company as at 31 December 2024 and of the net movement in funds for the financial year then ended; and
- have been properly prepared in accordance with the relevant financial reporting framework and, in particular, with the requirements of the Companies Act 2014.

The financial statements we have audited comprise:

- the Statement of Financial Activities;
- the Balance Sheet;
- the Statement of Cash Flows; and
- the related notes 1 to 25, including a summary of significant accounting policies as set out in note 1.

The relevant financial reporting framework that has been applied in their preparation is the Companies Act 2014 and FRS 102 'The Financial Reporting Standard applicable in the UK and Republic of Ireland' issued by the Financial Reporting Council ("the relevant financial reporting framework").

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are described below in the "Auditor's responsibilities for the audit of the financial statements" section of our report.

We are independent of the company in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the company's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Other information

The other information comprises the information included in the Annual Report and Audited Financial Statements, other

than the financial statements and our auditor's report thereon. The directors are responsible for the other information contained within the Annual Report and Audited Financial Statements. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Responsibilities of directors

As explained more fully in the Directors' Responsibilities Statement, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view and otherwise comply with the Companies Act 2014, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless

the directors either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

Auditor’s responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor’s report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on IAASA’s website at:
<https://iaasa.ie/publications/description-of-the-auditors-responsibilities-for-the-audit-of-the-financial-statements/>
This description forms part of our auditor’s report.

Report on other legal and regulatory requirements

Opinion on other matters prescribed by the Companies Act 2014

Based solely on the work undertaken in the course of the audit, we report that:

- We have obtained all the information and explanations which we consider necessary for the purposes of our audit.
- In our opinion the accounting records of the company were sufficient to permit the financial statements to be readily and properly audited.

- The financial statements are in agreement with the accounting records.
- In our opinion the information given in the directors’ report is consistent with the financial statements.
- In our opinion, those parts of the directors’ report specified for our review, which does not include sustainability reporting when required by Part 28 of the Companies Act 2014, have been prepared in accordance with the Companies Act 2014.

Matters on which we are required to report by exception

Based on the knowledge and understanding of the company and its environment obtained in the course of the audit, we have not identified material misstatements in the directors’ report.

We have nothing to report in respect of the provisions in the Companies Act 2014 which require us to report to you if, in our opinion, the disclosures of directors’ remuneration and transactions specified by law are not made.

Use of our report

This report is made solely to the company’s members, as a body, in accordance with Section 391 of the Companies Act 2014. Our audit work has been undertaken so that we might state to the company’s members those matters we are required to state to them in an auditor’s report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company’s members as a body, for our audit work, for this report, or for the opinions we have formed.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2024

1. Accounting Policies

The principal accounting policies are summarised below. They have all been applied consistently throughout the current and the preceding financial year.

Basis of Preparation

Children's Health Foundation is a company incorporated in Ireland under the Companies Act 2014. The address of the registered office is 14-18 Drimnagh Road, Crumlin, Dublin 12. The nature of Children's Health Foundation's operations and its principal activities are set out in the directors' report. In accordance with Section 1180(8) of the Companies Act 2014, the company is exempt from including the word "Limited" in its name. The company is limited by guarantee and has no share capital.

The financial statements have been prepared on a going concern basis in accordance with the historical cost convention. The financial reporting framework that has been applied in their preparation is the Companies Act 2014, FRS102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" issued by the Financial Reporting Council and the Statement of Recommended Practice applicable to charities preparing their financial statements in accordance with FRS102 ("the Charities SORP") as published by the Charity Commission for Northern Ireland and the Office of the Scottish Charity Regulator which are recognised by the UK Financial Reporting Council (FCR) as the appropriate bodies to issue SORPs for the charity sector.

The functional currency of Children's Health Foundation is considered to be Euro because that is the currency of the primary economic environment in which the company operates.

Income

Income is recognised in the Statement of Financial Activities (SOFA) in accordance with SORP rules which are based on three criteria being met which are entitlement, measurement, and probability.

Research grant income is deferred as it relates to income received that has conditions attached to it and is released to income once the associated project costs are incurred for the relevant research project and the conditions are met.

As with many similar charitable organisations, independent groups from time to time organise fundraising activities in the name of Children's Health Foundation. However, as amounts collected in this way are outside the control of the Foundation, they are not included in the financial statements until received by the Foundation.

Bequests/Legacies in kind are accounted for at valuation.

Grants

Grants are issued on a cash basis as costs are incurred by beneficiaries. Expenditure incurred on research projects are recognised as a liability in the accounts.

Government Grants

Government grants are not recognised until there is reasonable assurance that the Foundation will comply with the conditions attached to them and that the grants will be received. Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the Foundation with no future related costs are recognised as income in the period in which they are received. Amounts are recognised as income over the periods necessary to match them with the related costs and are deducted in reporting the related expense.

Expenditure

All expenditure is accounted for on the accrual basis. The Foundation records expenditure as expenditure on raising funds; expenditure on charitable activities and expenditure on support costs which are allocated between expenditure on raising funds and expenditure on charitable activities.

- Expenditure on raising funds include costs directly associated with generating fundraising income. Examples of these are direct fundraising salaries, donor acquisition costs, marketing, support materials and event costs.
- Expenditure on charitable activities include grants made in pursuit of the Foundation's objectives of promoting medical and scientific research and funding to Children's Health Ireland at Crumlin and Temple Street and the National Children's Research Centre. These are primarily made up of grants issued to Children's Health Ireland and National Children's Research Centre and in addition, includes an allocation of Children's Health Foundation staff who are responsible for grant management and program support and an allocation of hospital literature and promotional materials.
- Other expenditure includes those support costs incurred to manage the funds generated by the Foundation. These include salary costs, governance, IT, HR costs and audit fees. Support costs are allocated to expenditure on raising funds and charitable activities. Allocation methods used are staff numbers, staff time and space occupied.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2024 (cont'd.)

Funds Accounting

The Foundation maintains the following funds:

Unrestricted General Funds

Unrestricted funds represent amounts which are expendable at the discretion of the directors in the furtherance of the objectives of the charity.

Designated Funds

Designated funds are unrestricted funds which have been ring-fenced by the directors for major projects committed for funding for Children's Health Ireland as detailed in note 21. Conditions are attached to designated funds, and the Foundation can redistribute funds if these conditions are not satisfied.

Restricted Funds

Restricted funds represent donations which are subject to specific conditions as specified by the donors or grant making institutions. Expenditure which meets this criterion is allocated to the relevant fund.

Foreign Currency

Transactions in foreign currency are recorded at the rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated at the rate of exchange ruling at the balance sheet date. All differences are taken to the Statement of Financial Activities.

Tangible Fixed Assets

Tangible fixed assets are stated at cost, less accumulated depreciation. Depreciation of fixed assets is provided on cost in equal instalments over the estimated useful lives of the assets. The annual rates of depreciation are as follows:

- Buildings - 2%
- Fixtures and Fittings - 10%
- Office and computer equipment - 20%.

Investments

Investments are shown at fair value. Unrealised movements on revaluation are included in the SOFA. Income from investments is recognised in the financial period as it is receivable.

Pensions

The Foundation makes contributions to pension plans selected by relevant employees and administers contributions made by and on behalf of the employees who are invested in PRSAs. The amounts charged to the SOFA in respect of pension costs are the contributions

payable in the year. Differences between contributions payable in the financial period and contributions actually paid are shown as either accruals or prepayments in the balance sheet.

Short-term deposits

Short-term deposits are recognised initially at fair value, including transaction costs incurred. Subsequent to initial recognition, short-term deposits are measured at amortised cost using the effective interest method, less any impairment losses.

Cash and cash equivalents

Cash at bank and in hand is held to meet short-term cash commitments as they fall due rather than for investment purposes and includes all cash equivalents held in the form of short-term highly liquid investments. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash and that are subject to an insignificant risk of changes in value. A cash equivalent will normally have a short maturity of three months or less from the date of acquisition.

Financial Instruments

Financial assets and financial liabilities are recognised when the company becomes a party to the contractual provisions of the instrument.

Financial liabilities are classified according to the substance of the contractual arrangements entered into.

(i) Financial assets and liabilities
All financial assets and liabilities are initially measured at transaction price (including transaction costs), unless the arrangement constitutes a financing transaction. If an arrangement constitutes a financing transaction, the financial asset or financial liability is measured at the present value of the future payments discounted at a market rate of interest for a similar debt instrument.

Financial assets are derecognised when and only when a) the contractual rights to the cash flows from the financial asset expire or are settled, b) the company transfers to another party substantially all of the risks and rewards of ownership of the financial asset, or c) the company, despite having retained some significant risks and rewards of ownership, has transferred control of the asset to another party and the other party has the practical ability to sell the asset in its entirety to an unrelated third party and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2024 (cont'd.)

Financial liabilities are derecognised only when the obligation specified in the contract is discharged, cancelled or expires.

Balances that are classified as payable or receivable within one year on initial recognition are measured at the undiscounted amount of the cash or other consideration expected to be paid or received, net of impairment.

Short-term deposits are recognised initially at fair value, including transaction costs incurred. Subsequent to initial recognition, short-term deposits are measured at amortised cost using the effective interest method, less any impairment losses.

2. Going Concern

The Foundation had net current assets of €41m (2023: €35.0m), including €36.8m (2023: €31.6m) in cash at bank and other liquid investments at the year end and had €13.6m (2023: €13.6m) of unrestricted reserves at that date.

The financial statements have been prepared on a going concern basis. The directors have considered the impact of macroeconomic factors including the cost-of-living crisis, rising interest rates and the impact of the Ukrainian and Gaza conflicts on the fundraising sector. Given the Foundation's main sources of income are currently from voluntary sources and fundraising activities, there is a clear possibility that the Foundation's operations could be affected in 2025/2026, and its incoming resources could be disrupted should further additional or unknown events continue for the coming year.

Management and the Board have reviewed the Foundation's projections, and consider that the projections, together with the reserves held indicate, that the company has adequate resources to operate within the level of its current cash flows and reserves for the foreseeable future (at least twelve months from the date of approval of these financial statements).

Thus, they continue to adopt the going concern basis of accounting in preparing the annual financial statements. Accordingly, these financial statements do not include any adjustments to the carrying amount and classification of assets and liabilities that may arise if the company was unable to continue as a going concern.

3. Critical Accounting Judgements and Key Sources of Estimation Uncertainty

In the application of the Company's accounting policies, which are described in note 1, the directors are required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

Critical judgements in applying the Foundation's accounting policies.

There were no critical judgements made by the directors during the financial year.

Key sources of estimation uncertainty

Tangible Fixed Assets:
In Note 13 to the financial statements, tangible assets are stated at cost, less depreciation. To calculate the depreciation of tangible assets, the Directors of the Foundation estimate the useful lives of a specific asset class considering the type of assets, past experience, estimated residual value and the expected useful life.

Buildings are assessed for indicators of impairment at each balance sheet date. If there is objective evidence of impairment, an impairment loss is recognised in the statement of financial activities.

4. Company Status

The Company is a company limited by guarantee. Every member of the company undertakes to contribute to the assets of the company in the event of the company wound up while he/she is a member, or within one year after he/she ceases to be a member, for payment of the debts and liabilities of the company contracted before he/she ceases to be a member, and of the costs, charges and expense of winding up, and for the adjustment of the rights of the contributors among themselves, such amounts as may be required not exceeding €1.8m.

Redevelopment & New Service Development	38	24	62
	384	242	626

Support costs include salary costs, governance, IT, HR and audit fees. These costs are allocated to charitable activities using allocation methods of staff numbers and space occupied.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2024 (cont'd.)

9. Analysis of Support Costs

Support costs are those costs incurred to manage the funds generated by Children's Health Foundation. Allocation methods used to apportion to charitable activities are staff numbers on activities for all headings below except for premises costs and depreciation which are allocated based on space occupied. These costs are allocated across expenditure on raising funds and charitable activities as noted below.

	Fundraising Activities 2024 €'000	Charitable Activities 2024 €'000	Total Support Costs 2024 €'000
Salaries	490	102	592
Travel and accommodation costs	-	-	-
Administration & Communications	154	-	154
Premises costs	50	-	50
Professional & Governance costs	40	-	40
Depreciation	200	-	200
Banking & Finance costs	62	-	62
Total	996	102	1,098

Analysis of support costs – prior year:

	Fundraising Activities 2023 €'000	Charitable Activities 2023 €'000	Total Support Costs 2023 €'000
Salaries	459	161	620
Travel and accommodation costs	3	1	4
Administration & Communications	131	40	171
Pension costs	19	3	22
Professional & Governance costs	38	11	49
Depreciation	165	26	191
Banking & Finance costs	88	-	88
Total	903	242	1,145

NOTES TO THE FINANCIAL STATEMENTS
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2024 (cont'd.)

10. Net Income/(Expenditure)

Net income for the financial year is stated after charging:

	2024 €'000	2023 €'000
Depreciation of tangible fixed assets (note 13)	200	191

11. Employees and Remuneration

The average number of persons employed by the Foundation during the financial year was 43 (2023: 41) and is analysed into the following categories:

	2024	2023
Fundraising	23	21
Charitable Activities	8	6
Support & Management	12	14
	43	41

	€'000	€'000
The staff costs amounted to:		
Salaries	2,220	2,333
Social welfare costs	243	232
Pension costs (Note 18)	59	51
Severance payments	-	-
	2,522	2,616

The number of employees at each of the salary bands (salary and allowances and other benefits, excluding PRSI and pension contribution) from €70,000 and above are as follows:

	2024	2023
Salary Band €70,001- €80,000	2	5
Salary Band €80,001 - €90,000	4	1
Salary Band €90,001 - €100,000	-	-
Salary Band €100,001- €110,000	-	-
Salary Band €110,001- €120,000	1	1
Salary Band €120,001- €130,000	-	1
Salary Band €130,001 - €140,000	-	1
Salary Band €140,001 - €150,000	-	-

Total key management compensation (salary, PRSI, pension contribution, allowances, and other benefits) for the financial year was €258,204 (2023: €507,949)

NOTES TO THE FINANCIAL STATEMENTS
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2024 (cont'd.)

12. Taxation

In accordance with the provisions of section 207 (as applied to companies by Section 76) Section 609 (Capital Gains Tax) and Section 266 (Deposit Interest Retention Tax) of the Taxes Consolidation Act, 1997, under charity number CHY13534, Children’s Health Foundation has been granted a tax exemption. This exemption, which applies to Corporation Tax, Capital Gains Tax and Deposit Retention Tax, extends to income and property of Children’s Health Foundation.

13. Tangible Assets

14. Investments

	2024 €'000	2023 €'000
A. Investment Funds		
At 1 January 2024	4,045	3,434
Additions	-	-
Disposals	-	-
Movement in fair value	508	611
At 31 December 2024	4,553	4,045
B. Investment in Equity Instrument		
At 1 January 2024	15	-
Additions	-	17
Disposals	-	(2)
Movement in fair value	4	-
At 31 December 2024	19	15
C. Short-term Deposits (at Amortised Cost)		
At 1 January 2024	-	-
Additions	18,224	-
Disposals	-	-
Movement in fair value	-	-
At 31 December 2024	18,224	-
Total Investments	22,796	4,060

Investment funds are included in the financial statements at fair value, and any fluctuations are accounted for in the Statement of Financial Activities. The investments were held with the following investment managers at the financial year end:

	2024 €'000	2023 €'000
Irish Life Investment Managers Limited: <i>MAPS Scheme</i>	1,226	1,107
Quilter Cheviot Investment Management: <i>Diversified Portfolio</i>	3,327	2,938
	4,553	4,045

The Foundations holds short-term deposits amounting to €18.2m with a term of 171 to 365 days and can be accessed upon giving notice of 30 days. These deposits earn interest rates of 2.57% to 3.62% per annum. The deposits are held with a reputable bank and are subject to insignificant risk of changes in value. There are no restrictions on the withdrawal of these funds other than the notice of period required and the foregoing of interest.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2024 (cont'd.)

15. Cash and Cash Equivalent

	2024 €'000	2023 €'000
Cash in banks	16,597	31,571
Cash equivalent	2,002	-
	18,599	31,571

Cash equivalent consists of treasury deposits which are readily convertible to known amount of cash and is subject to an insignificant risk of changes in value. This is subject to an interest rate varying between 1.5% and 2.3% and has a term of three months or less. There are no restrictions on the withdrawal of this fund other than the notice of period required and the foregoing of interest.

16. Debtors

	2024 €'000	2023 €'000
Debtors and prepayments	59	51

Other creditors	11	8
PAYE/PRSI	69	68
Deferred income (Note 18)	-	254
	464	726

NOTES TO THE FINANCIAL STATEMENTS
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2024 (cont'd.)

18. Deferred Income

Deferred Income comprises of grants for specific research projects carried out by the NCRC. This income is released as the associated project costs are incurred for the relevant research project.

	2024 €'000	2023 €'000
Balance at start of year	254	-
Receipt of deferred income during the year	-	254
Amount released to income earned from charitable activities	(254)	-
Balance at end of year	-	254

19. Financial Instrument

The carrying values of the company's financial assets and liabilities are summarised by category below:

	2024 €'000	2023 €'000
Financial assets		
<i>Measured at amortised cost</i>		
- Cash and cash equivalent	18,599	31,571
- Short-term deposits	18,224	-
<i>Measured at fair value through SOFA</i>		
- Current asset listed investments	4,572	4,060
Financial liabilities		
<i>Measured at undiscounted amount payable</i>		
- Trade creditors	315	159
- Other creditors	11	8

20. Commitments

Pension Commitments

The Foundation makes contributions to pension plans selected by relevant employees and administers contributions made by and on behalf of employees which are invested in PRSAs. The contributions payable to the retirement benefit schemes during the financial period are charged to the Statement of Financial Activities. The amount paid in the financial year was €59k (2023: €51k). An accrual of €11k is included in the financial statements with respect to outstanding contributions at 31 December 2024 (2023: €8k).

Lease Commitments

No new lease contract was entered into during the year.

Other Restricted Funds	3,962	1,088	-	(359)	9	4,700
Total Restricted Funds	11,388	3,294	(81)	(1,420)	(424)	12,757
Total Funds of the Charity	36,648	17,760	(6,267)	(5,687)	-	42,454

The Foundation's designated funds relate to commitments approved by Board of Directors. At year end, total commitments amounted to €16.1m (2023: €11.7m), covering a wide range of projects in Children's Health Ireland at Crumlin, Temple Street, Tallaght and Connolly. These funds are subject to specific conditions, and where conditions are not fulfilled the Foundation can redistribute them.

Restricted funds represent donations, fundraising events income and legacies received, which can only be used for those purposes that have been specified by supporters with the intention of supporting a specific area, ward, department, or research project.

Transfers during 2024 included €366k of expenditure paid by CHF on behalf of the IIP-MRI restricted fund, which has now been allocated to that fund. In addition, a transfer of €540k was made from the Straight Ahead Fund to a newly agreed restricted fund for an EOSedge Scanner System. Further reclassifications were made between restricted and unrestricted funds. These transfers represent reclassifications between funds and do not constitute new income or expenditure.

The presentation of this note has been enhanced to show expenditure on restricted reserves as a separate column. Comparative information has been updated to follow the same format.
